GLUTATHIONE

Slow the aging process and fight disease with this powerful antioxidant!

Glutathione is essential for detoxification and cellular health. It aids in muscle recovery to enhance athletic performance, prevents and treats liver diseases, and improves immune function.

Glutathione neutralizes free radicals in the body and reduces oxidative stress to slow the aging process and the progress of cancer, diabetes, heart disease, Parkinson's, Alzheimer's, ulcerative colitis and many other diseases.

Supplementing glutathione maintains an adequate level of antioxidants in the body is essential to our overall health!

Add glutathione as an Antioxidant Push
to any IV or as an IM injection

IM Shot **\$25** | IV Add-on **\$20**

NAD⁺

Includes Health & Harmony Infusion and Glutathione push.

NAD⁺, a coenzyme essential to life, is present in every cell and cellular reaction of the body.

NAD⁺ contains unique neuroprotective properties and is critical to cellular biogenesis.

Administering a high dose of NAD⁺ straight into your bloodstream, compared to other routes (i.e. oral), gives you a faster, more effective outcome. The effects of the NAD⁺ occur almost instantaneously!

Within a few hours, patients report a progressive increase in energy, reduction in lethargy, and improvement in mood.

- Increase energy, boost ATP production in cells, increase metabolism, mood, and energy, and burn fat.
- Improve focus, concentration, and memory, and reduce brain fog.
- Slow the aging process and reduce signs of aging through cellular changes (telomere lengthening).
- Reduce anxiety and the depressing symptoms of PTSD and Major Depressive Disorder.
- Stop chronic pain and heal the body from the inside out.
- Detox and reduce addictive tendencies.

Benefits from IV NAD⁺ may continue to appear for several weeks. Client experiences vary depending on the degree of depletion.

NAD⁺ 250 mg | **\$400** 1-2 hour infusion
NAD⁺ 500 mg | **\$600** 2-4 hour infusion

OUR GOODIES

SPECIALLY SELECTED FOR YOUR GOOD HEALTH

GLUTATHIONE: One of the body's most powerful antioxidants, glutathione prevents and fights disease and slows down the aging process. In addition, it brightens the skin, helps the body to break down and get rid of fat, enhances sleep, combats sleep apnea, and reduces inflammation.

GAC: Consisting of three super amino acids (Glutamine, Arginine, Carnitine), this combo burns fat, boosts metabolic rates, balances hormones, and improves mood and stamina. It also aids in post-workout recovery, reduces tissue and joint inflammation, and prevents muscle loss.

L-CARNITINE: This amino acid is one of the building blocks of protein and increases the number of androgen receptors in muscles. It also promotes the utilization of testosterone and supports lean muscle production. L-Carnitine burns fat, increases energy, boosts immunity and metabolism, and aids in recovery from lactic acid buildup.

VITAMIN B-12: This important vitamin provides long-lasting, natural energy and improves mood. It also boosts metabolism by increasing red blood cell production, which makes it an ideal treatment for anemia.

B-COMPLEX: This combination of B vitamins (B1, B2, B3, B5, B6) promotes muscle tone, skin health, and immune and nervous system function. It also boosts the metabolism and reduces adrenal fatigue.

BIOTIN (AKA B7): Essential for healthy skin, hair, and nails, this B vitamin also supports healthy metabolic, nerve, digestive, and cardiovascular functions.

MIC: Consisting of three lipotropic amino acids (Methionine, Inositol, Choline), this combination aids in fat burning by specifically targeting fat deposits and stimulating fat metabolism in the liver.

SELENIUM: This essential micronutrient plays a major role in protecting cells and reducing cholesterol levels. It is involved in inflammatory response regulation and decreases the antibodies that contribute to autoimmune thyroiditis.

MAGNESIUM: A naturally-occurring mineral, magnesium reduces blood pressure and is often used to prevent eclampsia and muscle spasms.

VITAMIN C: This vitamin is a potent antioxidant that prevents cellular damage caused by free radicals. It plays a key role in collagen production, wound healing, and proper immune-cell functioning.

ZINC: This mineral boosts the immune system, facilitates wound healing, maintains normal growth rates, and hydrates the skin.

PEPCID: By decreasing acid production in the stomach, this medication effectively treats certain stomach and throat problems.

ZOFRAN: This medication is used to treat and prevent nausea and vomiting.

BENADRYL: This antihistamine drug controls allergic reactions.

IRON: This mineral is especially important for people with anemia, heavy menses, chronic fatigue, malabsorption, gastrointestinal bleeding, and excessive blood loss.

VITAMIN D3: In addition to supporting calcium absorption to promote teeth and bone health, this vitamin boosts the immune system to fight infections, regulate insulin levels, and aid in diabetes management.

TORADOL: By blocking the body's production of certain natural substances that cause inflammation, this medication decreases swelling, pain, and fever.
